

NUTEK AT GmbH Is hiring.

Signal Processing and Algorithms

- We are an innovative startup company.
- Field of Operation: Medical Device
- Working in close cooperation with the Medical University of Graz (MUG)
- Located at the Center of Knowledge and Technology Transfer in Medicine (ZWT)
A vibrant Eco-System of medical oriented startups, companies, and research centers in Graz.

- We develop the “Rainbow-Probe”, a novel medical device which will support the surgeon in real-time, during operation, to completely remove cancer tumors.
- If you are looking for a meaningful project which will affect people’s life, join us and be part of a multi-disciplinary development team,
- Position is on a Full-Time Basis and open for both female and male candidates.

- **Tasks description:**
 - Support system architecture definition
 - Spectral analysis and algorithms development, test, and validation
 - Work across the full product development cycle.

- **Required:**
 - Master or Doctor degree
 - Experience in signal/spectral analysis and applying AI/ML/DL methods.
 - EU Citizenship

- **An advantage:**
 - Experience in hyperspectral interpretation, medical device or engineering
- **Contact & send CV:**
 - Esther Mayer – Managing Director
