

Electronics Engineer at NORGANOID GmbH

Part-time or Full-time position

NORGANOID is a company in its scale-up phase that develops 3D-organ-on-chip systems for testing potential therapeutics in the pharma industry. We are seeking an Electronics Engineer to join our international team of experts, who are devoted to the pursuit of making true precision medicine a reality.

Start: April 2023

Part-time position: 20 - 40h per week

Your duties:

You will be working closely with our CTO, including the following activities in R&D:

- coordination of internal electronics projects
- development of electronics architectures on the system level
- representation of the electronics topics in the project core team
- prototyping
- contact person for customers in the field of electronics
- coordination of the electronics agendas in the inquiry process

Your profile:

- completed technical education (HTL, university degree) with a specialization in electronics, electrical engineering or similar
- relevant professional experience desirable
- knowledge in the field of electronics development (hardware and software)
- good written and spoken German and English skills are required
- strong communication skills and a systematic way of working
- creativity as well as the ability to work in a team
- experience with at least one EDA/CAD (Eagle, KiCAD or similar)
- experience with FPGA is a plus
- strong programming skills is a plus

We offer:

- On-site and remote working possibility
- Freedom to operate
- Chance to develop professionally and personally
- 1500 - 3000€ gross salary

Please, send us your CV and letter of motivation to office@norganoid.com.
